Meeting Summary

On 03/03/16 representatives from the Lahontan Regional Water Quality Control Board (Lahontan Board), State Water Resources Control Board (State Board), U.S. Environmental Protection Agency (USEPA), the U.S. Air Force (USAF), and the USAF's contractor CB&I Federal Services (CBI) met at the California EPA Headquarters building in Sacramento to discuss reoccurring issues with the cleanup program at the former George Air Force Base (GAFB). The meeting attendee list is provided below and the meeting agenda is attached. More specifically, the discussion addressed the need for more aggressive remedial strategies and next steps to hasten the investigation and cleanup to restore groundwater beneficial uses at the following four GAFB sites in a more reasonable timeframe than is projected using only monitored natural attenuation:

- 1) OU 1 chlorinated solvent plume (Site CG070)
- 2) Bulk fuel petroleum plume (Site ST067b)
- 3) Flightline petroleum plume (Site SS030)
- 4) Dieldrin pesticide plume (Site OT071)

The meeting was to follow-up on concerns raised about the four sites in the attached 01/08/16 letter from Patty Kouyoumdjian (Lahontan Board Executive Officer) to Stephen TerMaath (Chief of BRAC Program Management, USAF). After discussing the agenda items, a plan was developed for the sites consisting of a meeting for each site to work through the issues in more detail as documented in the attached table.
